## CAPS & DESICCANT PRODUCTS

SerioPharma offers a wide range of caps suitable for all the needs. SerioPharma produces caps with child-proof closure, with tamper evident, for powder distribution or with silica gel.

Silica gel ( $\text{SiO}_2$ )<sub>n</sub> is a polymer of silicon dioxide, synthetically made from sodium silicate. It is used in various fields as a desiccant (drying agent) for its dehydrating and extremely absorbent properties. Silica gel preserves, safeguards and absorbs humidity for a better conservation of medicines' active ingredients and products in general.
