Enemas and Micro-Enemas Kit

Enemas and micro-enemas kit

When oral administration is not possible, rectal application is the most suitable, quick, and safe option. SerioPharma's enema and micro-enema kits are the ideal packaging solution for glycerin enemas (or other evacuating solutions), suitable for both adults and children.

**Caps & Desiccant
products**

Caps & Desiccant products

SerioPharma offers a wide range of caps suitable for all the needs. SerioPharma produces caps with child-proof closure, with tamper evident, for powder distribution or with silica gel.

Silica gel (SiO_2)_n is a polymer of silicon dioxide, synthetically made from sodium silicate. It is used in various fields as a desiccant (drying agent) for its dehydrating and extremely absorbent properties. Silica gel preserves, safeguards and absorbs humidity for a better conservation of medicines' active ingredients and products in general.

SERIOPHARMA

Caps with PFP closures, TE and with seal insertion

	Screw	Pressure
Ø Neck	18-24-28-31-39	20-37
